Comfortable and of superior durability.*

SERIES -U- MULTIPURPOSE ARMCHAIR

UTILITY

ADAPTABLE, FUNCTIONAL AND STURDY

The **U-110 Model** Utility chair (shown at left) was designed according to specific criteria dictated by seating and positioning specialists and health care professionals. Its ergonomic design and the quality of its upholstery make it very comfortable. Its 16 gauge welded steel frame gives it superior strength and durability. It is highly stable in all directions thanks to its wide base. The UTILITY chair is stackable and can be used in common areas, dining rooms or bedrooms, and will surely meet your needs.

In long-term care, general purpose chairs are subject to intensive use. Chairs will be moved while patients are seated to bring them to a dining table, a restroom sink or to various activities. Such displacements may raise the risk of injuries to health care attendants, and incur equipment failures.

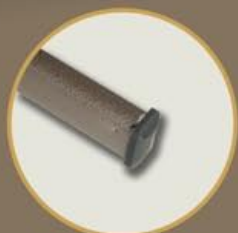

The **U-120 Model** Utility chair (shown at right) was designed with unique features to meet these particular uses. It benefits from an even stronger frame, and the seat-to-floor height can be set from 16" to 19" thanks to its adjustable legs. Safe moving of a patient is facilitated by the feet gliders and the ergonomic hand grip at the chair's back. The U-120 Model is also available in 24" width for obese patients.

U-110 Model
fixed height

U-120 Model
Adjustable height
as standard

U-C1 Option
(U-110 only)
